Since the Russian invasion in February 2022, we have expanded our team in Ukraine from 30 humanitarian staff members based in Mariupol to more than 400 working out of nine operational centers throughout the country—a courageous and committed team who so far have improved access to health supplies and services for more than 8 million people. The Ukraine conflict also created a ripple effect of displacement, hunger and disease that continues to affect millions worldwide. The war caused the prices of fuel, fertilizer and agricultural products to surge, exacerbating food insecurity in countries across Africa and the Middle East. With your unwavering support, International Medical Corps continued serving on the front lines of this hunger crisis—including Ethiopia, Somalia and Yemen—delivering lifesaving services to those who need it most.

As it has since our founding, training underpins everything we do. Each year, we train thousands of frontline health workers and community members, helping them gain the skills and knowledge they need to move from relief to self-reliance. As we expanded our services across Ukraine, working closely with international and national agencies and with regional and local healthcare providers, we discovered a need for advanced training in emergency and trauma care.

In response, International Medical Corps worked with partners to identify areas where such training could benefit medical staff, first responders and even the general public, covering everything from basic lifesaving techniques to advanced training in how to manage chemical, biological, radiological, nuclear and explosive hazards. With your support, we so far have provided training directly to more than 4,500 healthcare professionals in Ukraine—including Ukrainian instructors who now are leading the latest wave of training across the country—and we now are reaching millions more through a series of videos in Ukrainian, with English subtitles, on our YouTube channel.

In addition to our work in Ukraine, we continued in 2022 to respond to devastating natural disasters around the globe. International Medical Corps was among the first to respond when a massive earthquake struck Afghanistan, mobilizing staff and ambulances and providing critical trauma care to affected communities. In Pakistan, when an extreme monsoon season devastated communities across the country, our in-country team provided lifesaving services to tens of thousands of people, delivered nearly 9 million liters of potable water and are continuing to help those displaced by the floods. And earlier this year, when 7.8- and 7.5-magnitude earthquakes struck Turkey and Syria, our courageous teams rapidly responded in both countries, deploying mobile medical units and delivering desperately needed supplies, including medicines, blankets and winter clothes. As recovery operations continue, International Medical Corps is working closely with local partners and public authorities to ensure that our relief efforts lead to long-term recovery.

We also responded to natural disasters here at home, quickly deploying mobile teams to help people whose lives were upended by Hurricane Ian in Florida and Hurricane Fiona in Puerto Rico. And throughout the year, we continued our work rebuilding health facilities and strengthening healthcare services for thousands displaced in late 2021 by tornadoes in Kentucky, while we improved healthcare services for communities in need in California, Florida, Louisiana and South Carolina.

Of course, all of this is possible because of you and your investment in our work worldwide. You have chosen to be part of a community that is building a better future. Your generosity enabled our 8,000+ staff members—96% of whom are hired locally—and hundreds of volunteers across some 30 countries to reach more than 20 million people last year with comprehensive healthcare and training programs.

With your continued support, we remain ready to help, whenever and wherever we are needed. Thank you for being part of our global community. As challenges arise in 2023, we are meeting them together.
We provide training and deliver emergency healthcare, along with related services, to those affected by conflict, natural disaster or disease. We do this no matter where they are in the world and whatever the conditions may be. We train people in their own communities, building resilience, providing them with the skills they need to recover, and helping them to build self-reliance and become effective first responders themselves.
OUR APPROACH

SPEED SAVES LIVES

Our emergency response teams deploy quickly to assist those in great need—often arriving within hours—even in the most remote, challenging environments.

We draw on our experience gained in 39 years of responding to disasters in more than 80 countries on six continents. Our surge capacity includes physicians and nurses trained in emergency medicine, supported by specialists in essential healthcare services that range from mental health and psychosocial support to technical expertise in gender-based violence, nutrition, and water, sanitation and hygiene.

We maintain our capacity to respond quickly because speed saves lives in the initial hours following a disaster. As conditions ease, we stay on and partner with survivors to build a better, more independent future for those we’re helping. The key to our approach is training—an essential component of all our programs, used to transfer the latest knowledge and skills into local hands, to help ensure a brighter future. We strengthen local health systems and work with community leaders, hire and train local staff, develop partnerships and evaluate progress to ensure quality outcomes.

With a staff that numbers more than 8,000 worldwide, 96% of whom are recruited locally, our strategy ensures that the knowledge and tools required to prepare for—and respond to—future emergencies are culturally compatible and remain available in the community. We work to ensure that if disaster strikes again, residents can be their own first responders.

ZIMBABWE
Though we faced many challenges in 2022, our committed and courageous teams met those challenges head on, delivering lifesaving services and training to those who needed it most.

The Russian invasion of Ukraine last year forced more than 13 million Ukrainians to flee their homes, and nearly 18 million—almost half the population—need urgent humanitarian assistance. Our emergency response team responded immediately to the crisis, reaching more than 6 million people with health-related supplies and services since the invasion. In Pakistan, an extreme monsoon season devastated communities across the country, damaging or destroying more than 2 million homes and affecting 3.6 million acres of crops, leading to damages estimated at $15 billion. Building on our initial widespread response, our mobile teams continue to provide lifesaving services to flood-affected communities—delivering clean water and medicines to roadside tent villages and providing emergency health services to those most in need. We also responded in 2022 to natural disasters here at home, quickly deploying mobile teams to help people whose lives were upended by Hurricane Ian in Florida and Hurricane Fiona in Puerto Rico.

In response to the ongoing hunger crisis in the Horn of Africa and the surrounding region, we screened 1,339,957 children for malnutrition across Ethiopia, Somalia and Yemen, and provided 173,814 caregivers of children under 2 with nutrition counseling services.

As part of our programs in Jordan that offer mental health care services to vulnerable groups, we provided 76,767 MHPSS consultations.

In Afghanistan, where 97% of people live below the poverty line and have little to no access to health facilities, we operated 49 mobile medical teams and provided 596,458 outpatient consultations via mobile teams and static health facilities.

In Ukraine, we are supporting 165 healthcare facilities across the country, rehabilitating damaged clinics, providing training and delivering hundreds of tons of medical supplies and equipment, including lifesaving medicines, PPE and reproductive health kits.
DECADES OF PROVIDING TRAINING

When Dr. Bob Simon founded International Medical Corps in 1984, he knew he could broaden his impact significantly by training people from local communities. Since then, training has become the foundation of our work, providing people with the support they need to move from relief to self-reliance. In Ukraine, for example, we’re delivering first-aid and basic life support, trauma-care and psychological first-aid training.

GLOBALLY, IN 2022, WE TRAINED

- 91,645 people through 2,240 training sessions covering a range of health-related issues.
- 13,526 people in infant and young-child feeding support and counseling.
- 5,410 people in gender-based violence prevention and response.
- 10,829 people in mental health and psychosocial support.

SOUTH SUDAN
The Russian invasion of Ukraine highlighted the need for advanced training in emergency and trauma care at the pre-hospital and hospital levels. International Medical Corps worked with Ukrainian partners to identify areas where training could benefit medical staff, including training and preparedness to manage trauma and mass casualties, as well as cases related to chemical, biological, radiological, nuclear and explosive hazards.

International Medical Corps and the Harvard Humanitarian Initiative worked with the American College of Surgeons, Emergency Nursing Association and World Health Organization to develop and deliver this training in Ukraine. In 2022, we deployed 91 trainers to Ukraine, held 80 training sessions and trained more than 2,300 people in trauma care, covering such topics as:

- Advanced Trauma Life Support Fundamentals
- Trauma Nurse Fundamentals
- Pre-Hospital Trauma Fundamentals
- Pediatric Trauma Fundamentals
- Stop the Bleed®
- Mass Casualty Management
- Chemical, Biological, Radiological, Nuclear and Explosives

We also trained clinicians, first responders and caregivers in psychological first aid (PFA) in both Ukraine and in Poland, where many Ukrainian refugees live. “Working in an ambulance, I am the first to meet people in times of despair, illness or emergency,” explained PFA trainee Olha Kurtyniak, a paramedic based in Stryi, Ukraine. “Each person who is exposed to stress reacts to it differently—sometimes a person needs psychological help more than medical help.” With International Medical Corps’ help, Kurtyniak and others like her know how to provide PFA responsibly, who can provide it, when and where it should be provided, and when someone should be referred for specialized care. The training also equips students with self-care techniques that enable caregivers to help themselves—so they can continue helping others.
In 2022, International Medical Corps responded directly to the needs of more than 20 million people in 30 countries on five continents.

Among the results of our work:

20 million
direct beneficiaries
Of these, nearly 3 million were children under 5. Our work also reached more than 68 million others who benefited indirectly from our programs and work.

7.7 million
primary medical consultations
Of these, nearly 2 million were children under 5.

91,645
participants trained
This included clinical and non-clinical health staff, government and non-government staff, community health workers and volunteers.

208,468 children vaccinated against measles
Vaccinating children protects future generations from the dangers of measles and builds more resilient immune systems.

1,675 health facilities supported
In 2022, we provided vital assistance to 1,775 primary health facilities and 172 hospitals, and operated 318 mobile clinics to reach people in underserved and remote areas.
WATER, SANITATION AND HYGIENE

The essence of good health
Helped more than 3.5 million people with water, sanitation and hygiene needs, and constructed or rehabilitated 1,220 latrines.

WOMEN’S AND CHILDREN’S HEALTH

The key to our future
Ensured that 96,533 births were assisted by a trained birth attendant.

MENTAL HEALTH CARE AND PSYCHOSOCIAL SUPPORT

The invisible wounds
Provided services to 957,248 people through hundreds of facilities, mobile teams and other means of delivery.

NUTRITION

The foundation of life
Provided 2,583,959 people with critical nutrition support and treated 232,437 children for acute and severe malnutrition.

GENDER-BASED VIOLENCE

A violation of fundamental human rights
Offered protection and support to 1,657,271 people living with the threat—or reality—of gender-based violence.

BY THE NUMBERS

Provided 2,583,959 people with critical nutrition support and treated 232,437 children for acute and severe malnutrition.

Ensured that 96,533 births were assisted by a trained birth attendant.

Helped more than 3.5 million people with water, sanitation and hygiene needs, and constructed or rehabilitated 1,220 latrines.

Provided services to 957,248 people through hundreds of facilities, mobile teams and other means of delivery.

Offered protection and support to 1,657,271 people living with the threat—or reality—of gender-based violence.
In 2022, we provided urgently needed healthcare and related services to more than 20 million people in 30 countries on five continents.
In the Media

Spotlight on Ukraine

International Medical Corps’ response to the war in Ukraine was covered by a host of media outlets, including CBS, CNN, NBC and Spectrum News.

In February, NBC News talked with Senior Director of Global Communications Todd Bernhardt about the humanitarian needs in Ukraine.

In March, MSNBC interviewed Chief Operating Officer Ky Luu about the role of humanitarian organizations in the Ukraine conflict.

In April, Scott Pelley of 60 Minutes interviewed Dr. John Roberts in Ukraine about International Medical Corps’ work delivering vital healthcare supplies and services in the country.

In July, two International Medical Corps nutrition and food security team members explained in the Wilson Quarterly how the Ukraine war is affecting the global food supply.

In December, Spectrum News interviewed Dr. John Roberts and Todd Bernhardt about our efforts to train healthcare workers and help people prepare for winter in Ukraine.

Throughout the year, we were featured in hundreds of “How to Help” lists in major media outlets—including The New York Times, The Los Angeles Times, Forbes, NPR and PBS NewsHour—for our responses to emergencies worldwide, including the Russian invasion of Ukraine, the earthquake in Afghanistan and flooding in Pakistan.

In April, People Magazine profiled Sanaa Lathan and her role as an International Medical Corps Global Ambassador. In the profile, Sanaa described our staff as “real heroes.”

In June, Afghanistan Country Director Matthew Stearns talked to NBC News about our response to the earthquake there and the many challenges facing Afghans.

In September, CNN interviewed Country Director Bakhtiar Ahmed about flooding in Pakistan, the needs of people there and International Medical Corps’ work to help them.
In honor of World Humanitarian Day on August 19, InterAction—an alliance of international NGOs—recognized outstanding humanitarian workers for their ongoing commitment and dedication, including International Medical Corps’ Dr. Abdou Sebushishe, Senior Advisor, Global Health Technical Unit, for his heroic work in South Sudan during the COVID-19 pandemic.

In May, we held our Annual Spring Luncheon. Guests joined President and CEO Nancy Aossey at the Bel-Air Bay Club to celebrate International Medical Corps’ lifesaving work and the community of supporters who make it possible. The event featured Dr. John Roberts of our emergency response team in a moving conversation with 60 Minutes producer Nicole Young about our current work in Ukraine. The committee for the luncheon included Sussie Aller, Avery Barth, Emma Bing, Pam Brendlinger, Laurne Cappello, Linda Cappello, Julie Carmen, Anjini Desai, Debbie Fisher, Jac Forbes, Jennifer Kell, Ellen Lipson, Pamela Mohr, Heidi Murkoff, Michelle Richman, Heidi Schulman, Leslie Thurman and Christine Toretti.

In September, International Medical Corps and Meta launched an ad campaign for Suicide Prevention Month. The campaign reached 588 million people in 35 countries with suicide prevention information.

Online game and digital content sales company Humble Bundle selected International Medical Corps to be one of four beneficiaries of their “Stand With Ukraine” game bundle. The bundle, which was available from March 12 to March 25, raised more than $5 million for our response.

Ubisoft, a French video game publisher, ran a charity stream to raise funds and awareness for International Medical Corps. The stream included promotional callouts to our mission and incentivized stream viewers to give by allowing them to help select which game the Ubisoft members played live.

Influenencers Step Up

Individual supporters also pitched in, holding their own fundraisers and encouraging donations.

- Joan Baez and Garry Trudeau both announced they would donate proceeds from their artwork to support our Ukraine response.
- Other celebrities promoted our Ukraine response on social media, including Genevieve Angelson, Ariana Grande, Judy Greer, Maz Jobrani, Dave Matthews Band, Julianne Moore, Mira Sorvino and Beyoncé’s charity organization, BeyGOOD.
- Through her company MUTHA, Hope Smith supported our work by donating a portion of its profits to International Medical Corps.
- The Broadway musical Jagged Little Pill donated proceeds from its ticket sales to support our flood relief efforts in Pakistan.
- Global Ambassador Ashley Park spent time with Ukrainian refugees in Poland, then shared with her followers how inspired she was by the refugees’ resilience and our ongoing work.
- Global Ambassador Inanna Sarkis traveled to an International Medical Corps-supported hospital in Poland. She met with Ukrainian refugee children and families, and shared how proud she was to represent us.
- US Army veteran Andrew Goldsmith skateboarded 101 miles along the California coast to raise awareness of the needs in Ukraine—and funds for International Medical Corps.
- The non-fungible token (NFT) community Cereal Club supported our Ukraine response by donating to International Medical Corps and sharing their support of our work.
Supporters of International Medical Corps came together for our Annual Awards Celebration to reflect on another year of lifesaving work and honor our courageous staff members. The event was attended by more than 300 guests and raised $880,000.

The event was led by Master of Ceremonies Jarl Mohn and International Medical Corps President and CEO Nancy Aossey. They began by introducing inspiring videos featuring International Medical Corps colleagues from around the world. After describing our long-time collaboration with supporter AIG, Nancy asked Rose Marie Glazer, Executive Vice President and Chief Human Resources Officer for AIG, to the stage, where she accepted the Global Citizen Award on the company’s behalf.

Nancy then presented the Dr. Henry Hood Distinguished Service Award to Stephen Tomlin, honoring his more than 30 years with International Medical Corps. Then Chloe Flower presented actor and activist Sanaa Lathan with International Medical Corps’ Humanitarian Award, honoring her ongoing service as a Global Ambassador. To close the evening, International Medical Corps Founder and Chairman Dr. Bob Simon presented the Founder’s Award to our team from Mariupol, Ukraine, to recognize their bravery and unwavering commitment to their country and their work—even as war raged around them.

Other participants included Leadership Council member Sabrina Kay and International Medical Corps first responder, actor and activist Genevieve Angelson.
STRENGTHENING LOCAL HUMANITARIAN ACTION TO ADDRESS CLIMATE IMPACT

With support from the French Ministry for Europe and Foreign Affairs, International Medical Corps partners with the International Council of Voluntary Agencies to help local and national NGOs in East Africa strengthen humanitarian responses in ways that are appropriate for environments affected by climate change. The project focuses on two priority themes: enhancing organizational systems and operational readiness, and including climate-impact considerations in humanitarian assistance. The multi-faceted learning approach includes individualized learning opportunities, training of trainers, and global and regional meetings around priority themes.

BUILDING A BETTER RESPONSE E-LEARNING

International Medical Corps has led the “Building a Better Response” (BBR) project since 2012, with generous support from the United States Agency for International Development’s (USAID) Bureau for Humanitarian Assistance (BHA), and working in partnership with Concern Worldwide and the Harvard Humanitarian Initiative. We train thousands of people each year to engage in a coordinated humanitarian response at the local, regional and national levels. In December 2022, we launched the new BBR e-learning platform, which features updated learning modules, new avatars, an updated color palette and new case-study assessments. Voiceover language options include Arabic, English, French, Polish, Spanish and Ukrainian, with additional transcript translations available in Dari, Portuguese, Russian, Turkish and Urdu. To create the platform, the BBR team incorporated feedback from previous learners to design the most user-friendly and relevant training possible.

PARTNERSHIPS

In 2022, International Medical Corps partnered with Tata Consultancy Services (TCS) to create a digital system to help streamline our prequalification of local vendors—an important measure that helps make our work even more efficient and cost-effective. Though International Medical Corps had been using a set of prequalification guidelines, the new digital system offers a number of improvements: it is fully accessible online, automates the documentation and approval process, and reduces our carbon footprint by eliminating the need to maintain physical documentation. We appreciate the assistance from TCS, which provided its services and resources free of charge.

KPMG LLP-audited financial statements are available on International Medical Corps’ website.

The resources of International Medical Corps’ worldwide global operations—consisting of government and UN grants, private funds, and donated products and services—totalled more than $369 million in fiscal year 2022. Approximately 91% of these resources went directly to program activities, reflecting International Medical Corps’ deep and enduring commitment to fiscal responsibility and efficiency.

HOW YOU CAN HELP

Give hope, give health.

There are many ways you can help International Medical Corps provide lifesaving care and help communities gain self-reliance after a disaster.

INTERNATIONALMEDICALCORPS.ORG/GIVE

WAYS TO GIVE

Become a monthly donor
Make a one-time gift via check, credit card, wire transfer or online
Make a gift of stocks or mutual funds
Make a gift in honor of a loved one
Make a gift via your donor-advised fund
Choose a Gift of Hope from our gift catalog internationalmedicalcorps.org/gifts
Give a gift of cryptocurrency bit.ly/DonateCrypto-IMC

WORKPLACE GIVING

Corporate matching gifts
Combined Federal Campaign for federal employees
Federal Designation: 10912

PLANNED GIVING

Create a gift in your will
Make a gift of life insurance
Leave a gift from your retirement account
Contact Elaine Bendistion at 310.826.7800 or Development@InternationalMedicalCorps.org for more information.

RESOURCES DEVELOPMENT

12400 WILSHIRE BLVD, SUITE 1500, LOS ANGELES, CA 90025
310.826.7800
International Medical Corps is headquartered in Los Angeles, CA, and has offices in Washington, DC; London, UK; and Split, Croatia.
